

Text Book of Pulmonary Medicine

by Dr. D Behra

It is 15 years since the first edition of the text book by the author was published.

Respiratory diseases impose a global burden affecting hundreds of millions of people & there is a sea change in understanding of these diseases. The importance of respiratory diseases have never been greater with new emerging threats like influenza pandemic along with the difficult to treat old existing diseases.

In sharp contrast to the fashion of multiauthor textbooks today, Dr D Behra has authored the entire textbook on respiratory disease himself. The book includes chapters on symptomatology, clinical evaluation, development & growth of lung and normal physiology along with pulmonary diseases. The current issues on lung transplant, pediatric lung diseases & critical care medicines are also well discussed.

Author's excellent clinical skills combined with international training & vast experience is evident in each chapter of the textbook. It is a value addition for all involved in respiratory care, be student, clinician, paramedical or researcher.

Textbook of Pulmonary Medicine 2nd edition, published by Jaypee Brothers Medical Publishers Limited, is authored by Dr D Behra & is available in two volumes having total 1787 pages. At the price of Rs. 2995, the book provides focused solutions for all those involved in the area of respiratory medicine.
